

Protect your lot and building
and catch intruders in the
ACT, instead of watching
them **vandalize** your
dealership **AFTER** the fact

Meet **Eyewitness Surveillance**.

Eyewitness Surveillance provides *remote, interactive video surveillance* to dealers that reduces theft and catches criminals **BEFORE** they steal/break in to your cars and lot facilities.

The Eyewitness system uses the latest in digital remote cameras, sensors, remote monitoring software analytics, and perimeter intrusion technology to keep your most valuable assets protected.

Their staff is a group of **highly-trained** security professionals, which includes **former/active military and police** that will monitor your property from the Tactical Operations Center and coordinate with authorities if there is an issue.

The Eyewitness remote monitoring system allows their team to communicate directly with individuals on your lot **LIVE** (the cameras actually talk - cool, right!?). This audio "reminder" that they are being watched is usually **enough to prevent crime!**

How much are you paying out of pocket to keep your insurance premiums from going up? How much peace of mind would you have if someone was "watching" your lot overnight?

*Contact **Julie Sells** for a consultation with Eyewitness Surveillance, or to learn more!*
