

Protect your Dealership with the most advanced Compliance Technology

ComplyAuto was designed to help dealers navigate FTC Safeguards, like the new extensive update to the Gramm-Leach-Bliley Act Safeguards Rule. The new safeguard requirements are complex, and involve many checks and balances, particularly in the area of cyber security. **ComplyAuto** was built specifically to help navigate these regulations, while housing all the requirements, checklists and helpful tools in one place.

Automated Compliance

Forget the forms, binders, spreadsheets, folders, manual audits, and training sessions. Compliance is automatically performed, logged and demonstrated in one simple platform.

Built by dealers

We're not just another software company. We've actually worked at dealerships and have spent our entire legal and compliance careers in the automotive industry.

More for less

Attorneys, consultants, and auditors are expensive. Not only is our software a more affordable option, it's faster, more accurate, more comprehensive, and always just a click away.
