

Fixed Operations is one of the largest revenue growth opportunities in the dealership.

Let DYNATRON help increase revenue straight to the bottom line.

Dynatron Software is the nation's leading fixed operations data analytics and consulting provider, with 30 years of expertise in fixed operations profit management expertise.

Dynatron's focus is to help dealerships increase their fixed operation profitability by Optimizing Pricing similar to what vAuto does in your sales department.

“Dynatron is like vAuto for your Fixed Operations “
– Dale Polack, vAuto Founder

Dynatron specializes in data-driven customer pay repair and maintenance pricing to make dealers the most money by increasing profitability on existing traffic. **Dynatron's** strategy, technology, and data-driven analytics are huge differentiators to optimize your customer pay repair and maintenance effective labor rate...resulting in a double benefit by maximizing your warranty labor rate increase! **Dynatron's** average dealership client reports an average lift of over \$250,000 within the first 6 months.

Dynatron Guarantees to Generate a Minimum 3 to 1 Return on Investment. For every dollar invested with **Dynatron**, dealers are guaranteed to make a minimum of 3 back, and the measurement is 100% transparent and quantifiable.

Contact Ann de St Aubin adestaubin@dynatronsoftware.com or call 612-963-0085 for a demo of how Dynatron can increase profits in service!
